WHAT AI SETS ME APART

AI-Driven Design Systems & Component Libraries

Built an AI-powered workflow to generate comprehensive design systems—from design tokens to reusable components—in minutes using reference images and prompts.

End-to-End AI-Native Product Design & Development

Designing and building robust, production-oriented products through AI-driven prompt-to-UI workflows, combining systematic design principles with vibe coding.

UX Knowledge Systems for Consistent AI-Driven Design

Developing a reusable UX knowledge system that integrates research insights, design principles, reusable patterns, and implementation guidelines to improve design consistency and guide AI-assisted product development.
